FOR IMMEDIATE RELEASE

SCB International Names Michael Varner as Director of Business Development

July 24, 2017 - Newtown, CT SCB International continues to invest in the growth of its Technical Services group and is pleased to announce and welcome Mr. Michael Varner as Director of Business Development effective June 15, 2017.

Mr. Varner brings over 20 years of experience in process engineering, project management, sales and marketing for a wide range of industrial products and services. Most recently, Mr. Varner was Senior Sales Manager for General Electric where he was responsible for the Power Services portfolio, managing relationships for existing key customer accounts, and developing new customers and markets.

Mr. Varner will lead the company's aggressive growth plan to provide integrated products and services to the power generation market in the area of Coal Combustion Residuals (CCR), including its patented Mercury Capture Systems (MCS) technology to allow beneficial use of coal fly ash, activated carbon, waste water sludge, and other industrial dusts.

Peter D'Amico, President and CEO, states "Mike brings vast experience in the power industry, along with important knowledge of environmental pollution control technology. We believe he is ideally suited for this position and will build momentum for the promotion of SCB's proprietary industrial technologies that deliver unmatched reduction of pollutant emissions while improving operational costs."

Mr. Varner has a Bachelor of Science degree in Chemical Engineering from Pennsylvania State University and a Masters of Business Administration from the University of Akron. He is a certified Six Sigma Black Belt and Project Management Professional (PMP). Mr. Varner will be based in Knoxville, TN.

SCB International, a Group D'Amico company, is dedicated to the mission of providing innovative materials solutions and technologies. SCB is a leading supplier of Innovative Solutions providing proven expertise and unparalleled service to assist in compliance with emissions limits and regulations, as well as providing performance benefits and cost savings. SCB is a key source of technical support and services, with full logistics capabilities, including shipping, rail, and trucking.
