SCB Invests in Natural Gypsum Quarry in Dominican Republic

November 10, 2015 – Newtown, CT

In the interest of enabling and improving the marketing and export of natural gypsum and other products derived from the mining of the Los Charquitos quarry Inversiones Ban Sai SRL (Ban Sai) has entered into a long-term joint marketing agreement with SCB International Materials, Inc (SCB).

SCB, dedicated to the supply of raw materials for the cement industry, will provide marketing and shipping support in the Caribbean, Latin America and the United States.

In addition, SCB has invested in the operations at the quarry. With this investment Ban Sai expects to increase production by 50%.

“I believe that to be successful, SCB must provide value to our suppliers as well as our customers. This investment will help Ban Sai improve the efficiencies of the operations at the quarry. We can pass these savings on to our customers. This business model differentiates SCB in the marketplace from traders and commodity brokers allowing us to continue to bring affordable quality products to our customers.”, said Peter D’Amico, president and CEO of SCB.

About Ban Sai:

Inversiones Ban Sai SRL is currently the largest operator and industrial exporter of natural gypsum in the Dominican Republic with reserves of more than 26 million metric tons. Ban Sai seeks to become the largest producer of gypsum in the Caribbean.

About SCB:

SCB International Materials, Inc is a leader and innovator in providing materials sourcing and solutions. SCB International utilizes the strength and knowledge of raw materials and by-products to help customers improve the process of manufacturing and implement technology solutions that positively impact the environment.
